Good Do It Yourself Guide

By Spits

This book is a good guide to counter some of the others out there that are entirely too oriented toward those with access to professional facilities. Few of the shade tree restorers among us have ready access to the full gamut of spray booths, high end abrasive blasting, two-stage compressors, etc.--you get the idea. This book is more focused on doing things economically. Following the guidelines in this book, you might not get the results that you would in a pro shop, but you will also avoid the easily recommended 'get all the best toys' mentality. One item of note: because this book is out of Great Britain, the product recommendations are not directly relatable to U.S. products / product lines, but comparable products are recognizable.

this one

By Osorio Batres Silvia Rebeca

As with all books by Martin Thaddeus, this one just starts on the subject without a whole lot of filler. I wish this guy wrote more books covering other automotive topics. A great buy for the true diy who doesn't have all the money in the world.

1 of 3 people found the following review helpful.

A very informative book.

By C. W. Joyner

This book has good information to learn. I shows you how to do all the painting. I was not able to try anything, because I am unemployed, and do not have any cash to do anything with.

This book goes right with Martin Thaddeus other book on body repair.

His body repair book is very very good. It will teach you to take a really really rusted out car, and make it new again. He teaches you how to repair parts of the car, without buying the part. Which is a much cheaper way of repairing it.
