Like BCO/MCO/NCO but for class D-A

By Jeffrey Bolden

This book and the first volume (Basic Chess Openings) (...) are an excellent opening book for players between class D and class A. They cover the basic ideas of the openings. In particular they look at all the

alternatives that your normal opening book assumes you already know how to refute.

So for example: 1 e4,e5, 2Nf3 Nc6, 3 Bc4. This is a line that everyone knows (the italian) and everyone knows the "correct response" is Bc5. But why?

Kallia first goes through the very natural Nf6 and how the two knights defense makes life very tough for black. He covers in detail the major lines of the two knights

- a) Violent central attack (4 d4)
 - b) Attack on the f7-pawn (4 g5)
- and their sub-variations

Having shown why 3 ..Nf6 isn't so good he then looks at 3..Nd4 (and shows how it is refuted by 4Nxd4 (while telling white to avoid the trap of 4Nxe5). Then he looks 3..Be7 and how this ends up too passive. Thus 3..Bc5 seems to be the only move left. From here the 3 main lines of the Italian are discussed, etc... Detailed thorough discussion of the basics for people who are capable of understanding opening theory but just don't know it yet. This book lays the groundwork for you to read an MCO level book. I strongly recommend it for the player with a USCF rating over 1000 and under 2000.

A solid book covering a variety of openings

By A Customer

Much like 'Basic Chess Openings' by the same author, this book covers many of the more common 1 d4 and other openings. Queens Gambit, Kings Indian, and a couple of others are covered in-depth with many of the variations discussed. Unlike some books, Grandmaster Kallai really tries to describe what you are trying to achieve with each opening/variation. For basic/intermediate level of play, I really recommend this book. The only reason it doesn't get five stars is because some openings are simply glanced at - almost as if it was a rush finish.
