Life will certainly be finished if you understand more things with reading publications.

NIETZSCHE AND PHILOSOPHY (EUROPEAN PERSPECTIVES) BY GILLES DELEUZE PDF

Praised for its rare combination of scholarly rigor and imaginative interpretation, Nietzsche and Philosophy has long been recognized as one of the most important analyses of Nietzsche. It is also one of the best introductions to Deleuze's thought, establishing many of his central philosophical positions.

In Nietzsche and Philosophy, Deleuze identifies and explores three crucial concepts in Nietzschean thought—multiplicity, becoming, and affirmation—and clarifies Nietzsche's views regarding the will to power, eternal return, nihilism, and difference. For Deleuze, Nietzsche challenged conventional philosophical ideas and provided a means of escape from Hegel's dialectical thinking, which had come to dominate French philosophy. He also offered a path toward a politics of difference. In this new edition, Michael Hardt's foreword examines the profound influence of Deleuze's provocative interpretations on the study of Nietzsche, which opened a whole new avenue in postwar thought.

AN EXCELLENT BEGINNER'S GUIDE TO OL' FRED!

By Ripper666

Deleuze takes Nietzsche's core ideas, repeating them and revealing them many times over--they are profound ideas that may change your life, or at least how you thought of Nietzsche--and leads the reader through Nietzsche's works so that at last a sort of understanding is reached. The book is difficult, true, but if you threw down Foucault or Sartre give this book a chance. Deleuze even translates foreign phrases for you--something even Gasset does not do, and he's an easy read generally, and he even composes an excellent summary chart of Nietzsche's main concepts discussed in the book: this kind of consistent repetition of terribly difficult and challenging concepts makes it much easier for us to stick with it, for as we go along in the book we are constantly coming upon the same lexicological associations with these concepts that makes them familiar, if not easier to grasp. Things you learn about Nietzsche will surprise you--as well as others, when you tell them!

This one started it all

By R. Jordan Greenhall

I was putting together my thesis on Nietzsche and, after pouring through the traditional secondary texts, was directed to Deleuze. Roughly twelve years later, I finally felt like I was able to make some sense of the damn thing.

Nietzsche wrote "for those with ears to hear". Deleuze heard and wrote in the same voice. Or, at least, with the same timbre. Brilliant, insightful, powerful, dense, abstract, chock-full of enough neologisms to make Webster blush. This book might be a complete departure from Nietzsche. But that is the point. While many might read closer to the letter of Nietzsche, no-one evokes the spirit. Not even close.

It is one of those ultra-rare literary experiences that challenges you to your utmost limit - never giving you a step of ground, but always hinting (seductively) at the glory at the top of the mountain.

If you read Nietzsche and felt that somehow all of the commentaries were a little "off", a little simplistic, then buy this book and give it a read.

Brilliant.

By Ignatius Slothrop

An outstanding book. Deleuze's reading of Nietzsche is remarkable and for the most part profoundly faithful. Perhaps my only real outright disagreement with Deleuze on Nietzsche is Deleuze's understanding of the Eternal Return. But even then I must follow Derrida and allow Deleuze to "read philosophy in a certain way". Deleuze sets up a lot of his own thought in this, so if you are familiar with Nietzsche and are interested in Deleuze this is a must read.
