THE SYMPHONY OF REFLEXES: INTERVENTIONS FOR HUMAN DEVELOPMENT, AUTISM, ADHD, CP, AND OTHER NEUROLOGICAL DISORDERS BY BONNIE BRANDES M.ED.

PDF

Primitive reflexes play an important role in the development of the neurological system in all aspects of our cognition, behavior, and movement. They affect our quality of life, determine our potential, and even our happiness. For children with disabilities, a group of unintegrated or undeveloped reflexes can not only affect their ability to learn but also play a large part in other neurological conditions, such as autism and cerebral palsy.

In *The Symphony of Reflexes: Interventions for Autism, ADHD, Cerebral Palsy, and Human Development*, Bonnie L. Brandes, MEd, provides a thorough discussion of these primitive reflexes and then presents specific movements in her program, “QRI Brain Boost,” designed to help children with learning disabilities and neurological conditions. As the founder of Quantum Reflex Integration, QRI®, the author uses acu-reflex points and cold laser to integrate primitive reflexes. Her programs are used in over thirty countries.

“The timing of this book could not be better, because the incidence of autism and other sensory and neurological disorders continues to climb at an alarming rate, a rate that cannot be exclusively explained by better labeling or improved diagnostic techniques. Understanding primitive reflexes and the role they play in neurological and social development is the key to healing this newest generation.

“The *Symphony of Reflexes* is not only a guide for the recovery of the nervous system for those with autism, ADHD, and other learning disabilities, but also a guide for human development and maximizing human potential.

“Finally, Bonnie brings to life environmental factors, such as stress during pregnancy, diet and nutrition, EM Radiation, and the Brain-Gut relationship, as well as the ever-growing amount of toxic chemicals that are part of our environment. Being aware of the potential causes is a key step in securing a healthier future for ourselves and the next generation of children.

“Bonnie has assembled an incredible amount of information and organized it in a helpful and straightforward manual. No matter how we are interacting with our environment, whether we are catching a ball, riding a bike, or holding a paint brush, each of these activities have their roots in *The Symphony of Reflexes*.” —Dr. Donald Gerken DC, DACCP, CSTD

The Lyme pain was completely gone by then but then I started feeling like I was releasing old emotions
By No Sugar Mama

I am totally and completely blown away by this book and the techniques that Bonnie is teaching here. I found out about Bonnie and her group from my neighbor who has been taking classes and working with Bonnie for a few years. She came over and worked my reflexes with her lasers when I was feeling a lot of pain and fear from a reassurance of Lyme disease. Not only did my fear go away, my Lyme pain went away too. When it came back the next day she came back and just kept working on me every day for two months. The Lyme pain was completely gone by then but then I started feeling like I was releasing old emotions, old thought patterns and much more. I'm not stressed every day or in fight, flight and freeze mode any more. I have PTSD from childhood issues and so far each day is so much less stressed and fearful. My anxiety is less and I'm able to handle difficult situations calmer. It's been four months of five day a week treatments (My neighbor is an incredible woman) and I see true healing happening because of this information, technique and Bonnie's vision. I'm so grateful. I am now starting Bonnie's first on line class and have bought my own laser set up and am working on the whole family plus some of my friends' kids who have learning disabilities and they too are doing great. One has had severe car sickness her entire life, she can't even make it out of town without having her mom pull over so she can throw up. I've been working on her with Bonnie's protocols and she just took a trip hundreds of miles away from home with not one pull over, not one time feeling sick. Bonnie really has found something here and I for one will continue this program as long as it's helping me feel calm and less fearful than I used to live with. Blessings to you Bonnie for sharing this with the world. And yes, four months later, still no Lyme. Amazing.

Amazing what reflex integration can do!

By Avid Reader

My little guy has Down syndrome and we started the integration program in this book six days ago. At first, he was a terror and a half! Days one through three were ROUGH... BUT he was already doing new things that first day! After a little less than a week, he's more social, his articulation has slightly improved, he's playing with his toys more appropriately, he's talking a little more, and most importantly, he seems so much happier! He's always been a happy kid, but I've never seen this guy smile or laugh so much! I can see him thinking (aka plotting) what he's going to do next. It's been great and knowing this is helping him makes

going through the rough days so worth it! I can't wait to see what's next. We're doing one reflex in the morning and one at night and hoping to start the QRI laser this year. I highly recommend!

Note: I did the first couple exercises on my husband and he experienced a detox effect the very first time and then fell asleep. My guy snuggled with me for an hour after the first exercise.

Critical information for children and adults with special needs

By Allegra Marie Ortiz

This book so clearly explains the reflexes that are critical for growth and development. Not only are the early stages defined, but the implications of a reflex that is not integrated are described, and then she teaches you how to address each specific reflex. This book is a great way to educate yourself on the reflexes and the importance of their integration, especially for children with special needs. Ordered one copy for myself, and halfway through the book we ordered 3 more for the special needs school where I work, as a training opportunity for all of our clinicians. Thank you for this important information Bonnie, and for writing it in such an eloquent way!
