“Terrific. ... Covers a wide range of pressing issues in higher education from the perspective and for the

benefit of students.” (Forbes)

“Selingo provides valuable information about what kids really need to know to not just be employable, but to be in a position to know what they want, know how to get there, and succeed once they’ve arrived. I will be planting this book in my teenager’s bookshelf.” (Jessica Lahey, New York Times bestselling author of *The Gift of Failure*)

“Explores several promising experiments that promise to redefine college as we know it.” (USA Today)

“A necessary and thoughtful contribution to the conversation on the role our colleges and universities play in preparing students for young adulthood. Everyone who has an interest in the development of today’s college students and tomorrow’s leaders should read it.” (Dan Porterfield, President of Franklin & Marshall College)

“Why are so many young adults wandering or straggling in the job market? How can parents help their kids thrive out there? Selingo convincingly frames the 21st century job market as a wholly unfamiliar terrain, then provides comprehensive strategies and tactical tips for tackling it.” (Julie Lythcott-Haims, author of *How to Raise an Adult*)

“Jeffrey Selingo demonstrates the radical changes complicating young people’s transitions to adulthood; highlights emerging and necessary transformations in the delivery of higher education; and, at the same time, gives students and their parents practical guidance in charting the best course.” (Hilary Pennington, Ford Foundation Vice President for Education, Creativity, and Free Expression)

“Levelheaded advice for students and parents on the best path to take from high school to employment.” (Kirkus)

“Essential reading for high school and college students and their parents. Selingo doesn’t just provide the answers, he makes sure his readers know the important questions to ask. Students looking for a roadmap to the future should get this book and heed its advice.” (Patricia Rose, Director of Career Services, University of Pennsylvania)

“In an age when jobs and career paths are likely to shift -- and even evaporate entirely -- at an unprecedented pace, Jeffrey Selingo’s *There Is Life After College* offers a practical road map for graduates faced with navigating a challenging and unpredictable terrain.” (Martin Ford, author of *Rise of the Robots: Technology and the Threat of a Jobless Future*)

“Bursting with fresh ideas and vivid examples. ... The breadth and depth of Selingo’s expertise make him a uniquely good guide to what’s undeniably a complicated topic.” (EdSurge)

“Jeffrey Selingo digs deep into what frustrated employers have known for quite some time: to fuel the economy with the next generation of leaders and innovators, we need grads who ask questions, have the grit of determination and can make quick, thoughtful decisions in ambiguous situations. A must read.” (Edward B. Rust, Jr., Chairman of the Board, State Farm Mutual Automobile Insurance Company)

there is life outside of college

By Reid McCormick

“Our twentieth-century education system is woefully out of sync with this twenty-first century economy that demands highly knowledgeable and flexible workers.” This quote from the introduction of *Life After College* perfectly sums up the entire book. To simplify this quote, education is woefully out of sync.

When I graduated college Myspace was the reigning champion in social media. Facebook, at the time, was a hobby or diversion for a few college students. Today, Myspace is a memory and Facebook dominates not just social media but our entire online experience. Rapid technological innovations and global market change everything we know almost constantly. Businesses and organizations cannot keep up. Education, from kindergarten to graduate schools, lag behind even farther.

Life After College is really about promoting education outside of college. Selingo introduces the reader to the importance of gap years, bridge programs, on-the-job training, internships, geographic advantages and so forth.

College is not the final straw anymore. It may be a very important straw, but it is not the final one. Gone are the days when simply getting a college degree guarantees you economic stability. With a growing number on college graduates and competition from people around the world, a college graduate needs to show up with more than a fancy diploma. “What you do in college is more important than where you go to college” (215).

I enjoyed this book a lot. Selingo knows his stuff and his writing is impeccable. I’m not fan of gap years and bridge programs. I think these programs only highlight the change needed in higher education. Additionally, I am not a supporter of gap years because I know without a doubt that a gap year would have been detrimental for me. Delaying formal education would have been a bad idea for me. Even though I changed my major three times in college and my career goals a dozen times, college still gave me the structure and

space I needed to succeed.

My favorite piece in the book is the chapter on employers. Usually we hear about how employers are frustrated at their new hirers, so it was great to hear how employers are also lost and unprepared.

I am always disappointed when I read about students choosing a college or a career and there is very little discussion about passion or higher calling. Finding a job that pays well is important, but finding a job that employs your strengths, empowers your soul, and inspires your passion is absolutely vital. That's why I really enjoyed the last chapter of the book describing your career story.

This is a great book with amazing information.

Clear and thoughtful guidebook for today's daunting system of higher education

By BrainScope

This is a practical and thorough handbook for students who are applying to college--or already in college, though it offer its greatest benefits to those who are still in the dizzying, fearful stages of figuring out where they want to apply. Selingo is smart, informed, and measured, avoiding alarmist warnings and unfeasible prescriptions in favor of lucid facts and thoughtful reasoning. If you are a parent who wants a state-of-the-art assessment of the best strategies for how to approach college that takes into account the importance of cultivating your child's individuality as well as the best opportunities for career development, then you can't do better than Selingo's clear-eyed account.
